

PLAY PALS In-Home sessions

We come to your home!

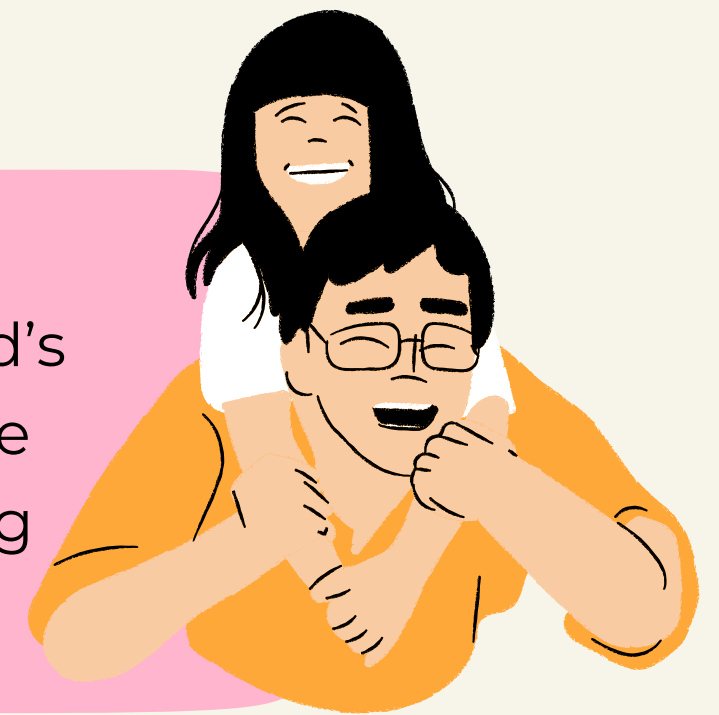

PARENT TRAINING

Think of us as the liaison between Play Pals and home! We will guide parents through routines, teach methods on how to model behaviors, communication, and co-regulation. We will also teach various ways to engage your child in communication as well as in supporting their participation with the ongoings of your household.

SOCIAL EMOTIONAL DEVELOPMENT

Guiding parents through approaches on how to promote self-regulation, while attending to their child's feelings and emotions. We will also work on skills like self-awareness, self-control, and relationship building through play and modeling.

Home ROUTINES

We will help parents create and implement an at-home schedule for their child. This can include a visual schedule to encourage your child to adhere to a routine and to help them know what to expect next.

BEHAVIORAL SUPPORT

Using Play Project strategies, we will offer behavioral support, like modeling behaviors and language. We will suggest tips for how to make behaviors more functional and provide visual aids for specific goals (ex: first/then board)
